Where Learners Grow

You will know after many months of hearing about COVID-19 that the three main symptoms are:

- a high temperature;
- a persistent cough or
- a loss or change of smell or taste.

If you experience any of these symptoms you should self-isolate and get tested. However, it has become apparent that this virus can present in all kinds of ways and there is now a wider set of symptoms which some people have also been testing positive with.

They include:

- Diarrhoea
- A persistent headache
- Fever and chills
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Sore throat
- Congestion or runny nose
- Nausea or vomiting

If your child has diarrhoea or has been vomiting, they should not return to school until they have been clear of symptoms for 48 hours.
